BIRLANU × ZOTOK CADENCE MEET

Invoice digitisation, *the count so far*

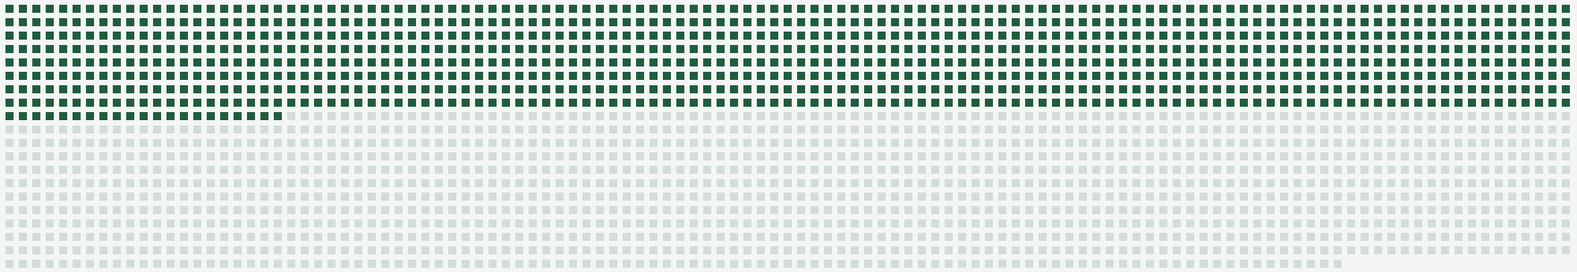

Parsing volume, approvals and issue resolution reported for this cadence — counted line by line, in full.

2,323	30,063	181	36
INVOICES PARSED · TILL DATE	LINE ITEMS PARSED · TILL DATE	INVOICES APPROVED	ISSUES RESOLVED

Five counts, *one page*

2,323	30,063	957	181	36
INVOICES PARSED · TILL DATE	LINE ITEMS PARSED · TILL DATE	INVOICES PARSED · SEPTEMBER	INVOICES · APPROVED	ISSUES · RESOLVED
cumulative	**12.9 / invoice**	**41.2% of total**	**7.8% of parsed**	**as reported**

EACH MARK = ONE INVOICE PARSED TILL DATE · FILLED = PARSED IN SEPTEMBER

SEPTEMBER SHARE OF TOTAL

41.2%

SEPTEMBER	957 INVOICES	957
BEFORE SEPTEMBER	58.8% OF TOTAL	1,366

181

INVOICES APPROVED

7.8% of the 2,323 invoices parsed till date

36

ISSUES RESOLVED

Each mark = one resolved issue

Four improvements, *now in place*

01 Invoice Reprocessing

Introduced the invoice reprocessing functionality for Man-in-the-Middle in zotok panel, allowing users to reprocess invoices either individually or in bulk, improving operational efficiency and reducing manual effort.

02 Automatic Rejection of Unclear Images

Implemented automated rejection of unclear or illegible invoice images directly on WhatsApp, enabling users to identify image quality issues immediately and upload clearer images for processing.

03 Original Invoice Link for Duplicate Detection

Enhanced duplicate invoice identification by providing a direct link to the original invoice, allowing users to quickly access and verify the previously submitted invoice.

04 Increased Page Display Limit

Enhanced the pagination functionality in the Zotok panel by increasing the number of entries displayed per page from **40 → 100**, making it easier for users to review and manage larger volumes of invoice records with fewer page navigations.
