Invoice mapping *coverage*

BirlaNu · 2–8 November 2026

PREPARED 10 NOVEMBER 2026

4,007 LINES · 279 INVOICES

AT A GLANCE

56 /60	137 /168	1,511 /2,187
DISTRIBUTORS FULLY IDENTIFIED	RETAILERS FULLY IDENTIFIED	PRODUCTS MAPPED AT LEAST ONCE
93.3%	81.5%	69.1%

01 / PARTIES

Distributors and *retailers*

Every line names a distributor and a retailer. Identification is decided once per invoice and stamped on each of its lines, so within the week an account can be **fully**, **partly** or **not at all** identified.

DISTRIBUTORS — 60 unique

56 FULLY **1** PARTLY **3** NOTHING — **5.0% UNIDENTIFIED**

RETAILERS — 168 unique

137 FULLY **13** PARTLY **18** NOTHING — **10.7% UNIDENTIFIED**

02 / PRODUCTS

What the invoice titles *matched*

The 3,681 counted lines carry 2,187 unique product descriptions. **1,511** of them (69.1%) matched a catalogue SKU at least once, landing on 580 distinct SKUs; 49 matched on some lines and not others, and 676 never matched.

MAPPED	BRANDING NOT FOUND	UNMAPPED
1,902	629	1,150
51.7% of lines	17.1% of lines	31.2% of lines

	UNIQUE	FULLY MAPPED	PARTLY	NOT MAPPED

RETAILERS	168	137	13	18
PRODUCTS	2,187	1,462	49	676

4,007 LINES IN THE EXPORT · 326 DUPLICATE-FLAGGED, SET ASIDE · 3,681 COUNTED · 279 INVOICES

04 / READING THE NUMBERS

How the counts are *built*

01 **A PRODUCT IS A DESCRIPTION**

The unit is the product title printed on the invoice, normalised for case, quote marks, unit spacing and known spelling variants. One catalogue SKU can account for several descriptions — the counts below are descriptions, not catalogue items.

02 **FULLY, PARTLY, NEVER**

A description is **fully mapped** when every line it appears on carries a SKU, **partly** when only some do, and **never** when none do. Mapping runs per distributor catalogue, so the same description can map for one distributor and not another in the same week.

03 **BRANDING NOT FOUND COUNTS AS MAPPED**

Both **Mapped** and **Mapped — branding not found** carry a SKU. The second means the product was identified but the invoice title did not carry the brand token; it is not a failure.

04 **DUPLICATES ARE SET ASIDE**

326 of 4,007 lines are flagged as duplicate invoices and are excluded from every count on these pages. Products are counted only on the 3,681 remaining lines.

05 / SCOPE

A **ONE WEEK**

These are the counts for 2–8 November 2026 only. They describe this window, not a year-to-date population, and are not comparable with counts covering a longer period.

B **THE EXPORT WE WERE GIVEN**

It lists SKUs in the 9000, 9600, 9800 and 9900 series only. An item that exists solely under another series cannot appear as matched here; absence from this report is not evidence that a product is missing from the catalogue.

C **MAPPING ONLY**

This report covers identification and product mapping counts. Line value is outside its scope.

Why these *did not* map

Reading each line back against the catalogue on its own words and sizes sorts the 676 descriptions into five kinds. The largest group is not a gap in the catalogue: it is the same product, written the way the counter writes it.

PRODUCTS — 676 descriptions · 1,043 lines

REASON	DESCRIPTIONS	LINES	SHARE
Catalogue product, title written differently The item is in the catalogue; the invoice phrases it its own way — `pvc pipe 90mmx4 kg birla` against `pressure pipe class 4 6m 90 mm`.	203	409	39.2%
Not in the catalogue extract 84 of them name another manufacturer's brand — Watertec, Tata, Astral; the rest are hardware, sanitaryware and tools the counter also sells.	278	377	36.1%
Catalogue family, this size or grade not listed The family is carried; the size, grade or pack on the invoice is not.	177	225	21.6%
Catalogue family, no size in the title The family is named, but the title carries no size to resolve it.	14	27	2.6%
Exactly as the catalogue, still unmapped Word for word a catalogue name, and the line still came back unmapped.	4	5	0.5%

RETAILERS — 18 of 168 never identified · 13 partly · 175 lines

REASON	PARTIES	LINES
GSTIN carried, no matching account	16	162
No GSTIN, phone only	1	12
No usable identifier on the invoice	1	1

On the partly identified accounts the mobile number was blank on 89% of the missed lines, and half of them also wrote the name differently.

DISTRIBUTORS — 3 of 60 never identified · 1 partly · 58 lines

REASON	PARTIES	LINES
GSTIN carried, no matching account	1	38
No usable identifier on the invoice	1	18
Company's own GSTIN, not a trade account	1	2

How each reason is read. Every description and party is taken from the line itself and matched against the 2,335-SKU catalogue extract of 18 October 2026: a shared product word and the title's own size decide the group, and a brand the catalogue does not carry reads as another manufacturer's product. Nothing is inferred about a party beyond the identifier the invoice carried.
