BIRLANU × ZOTOK CADENCE MEET

Invoice digitisation, *the count so far*

Parsing volume, approvals and issue resolution reported for this cadence — counted line by line, in full.

2,323	30,063	181	36
INVOICES PARSED · TILL DATE	LINE ITEMS PARSED · TILL DATE	INVOICES APPROVED	ISSUES RESOLVED

2,323 invoices, *30,063 line items*

Everything parsed so far, on one shared scale.

2,323

INVOICES PARSED · TILL DATE — FIG. 01

30,063

LINE ITEMS PARSED · TILL DATE — FIG. 02

0 — both bars to the same scale · max 30,063

FIG. A — READING THE RATIO

One invoice carries *about thirteen* line items.

30,063 ÷ 2,323 = **12.9 line items per invoice**
each block above = one line item, as counted

957 invoices parsed *in August*

Every mark below is one invoice parsed till date — filled marks are August's share.

41.2%

OF ALL INVOICES PARSED
TILL DATE CAME IN AUGUST

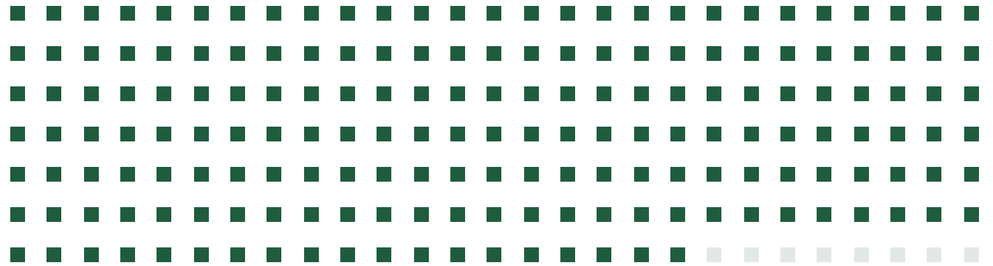

PARSED IN AUGUST 957 OF 2,323	957
PARSED BEFORE AUGUST 58.8% OF THE TOTAL	1,366

181 approved, *36 issues resolved*

Two closing counts for the cadence, drawn to scale.

INVOICES APPROVED — FIG. 03

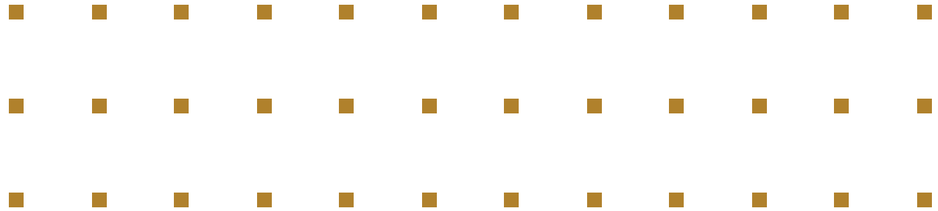

181

7.8% of the 2,323 invoices parsed till date
each mark = one approved invoice

ISSUES RESOLVED — FIG. 04

36

36 issues worked through and closed
each mark = one resolved issue

Four improvements, *now in place*

01 Invoice Reprocessing

Introduced the invoice reprocessing functionality for Man-in-the-Middle in zotok panel, allowing users to reprocess invoices either individually or in bulk, improving operational efficiency and reducing manual effort.

02 Automatic Rejection of Unclear Images

Implemented automated rejection of unclear or illegible invoice images directly on WhatsApp, enabling users to identify image quality issues immediately and upload clearer images for processing.

03 Original Invoice Link for Duplicate Detection

Enhanced duplicate invoice identification by providing a direct link to the original invoice, allowing users to quickly access and verify the previously submitted invoice.

04 Increased Page Display Limit

Enhanced the pagination functionality in the Zotok panel by increasing the number of entries displayed per page from **40 → 100**, making it easier for users to review and manage larger volumes of invoice records with fewer page navigations.

The five counts, *side by side*

01	No. of invoices parsed till date	TILL DATE	2,323
02	No. of line items parsed till date	TILL DATE	30,063
03	No. of invoices parsed in August	AUGUST	957
04	No. of invoices approved	REPORTED	181
05	No. of issues resolved	REPORTED	36
